

The leading SaaS delivered electronic trading solution
for energy markets

Joule® is Trayport®'s leading SaaS delivered electronic trading solution for energy markets. It provides an enhanced trading experience through an optimally configured desktop screen with mobile access and dedicated support.

Enhanced Joule Charting & Analytics

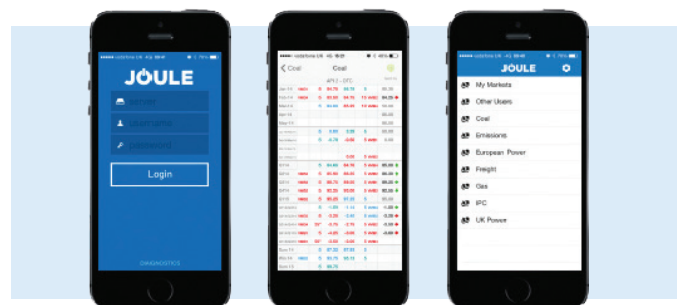

- A transparent analytical view of the market history as a basis for future trading strategies using your comprehensive historical data
- Overlay multiple contracts on a single chart for comparisons of contracts to clearly see relationships
- Visualise market trends and analysis by adding indicators such as Bollinger Bands, Moving Average Convergence/Divergence and Relative Strength Index to your charts
- Choose from 8 different chart types, including Continuous Chart, offering maximum flexibility that allows you to set up charts and data just the way you like them

Well Connected

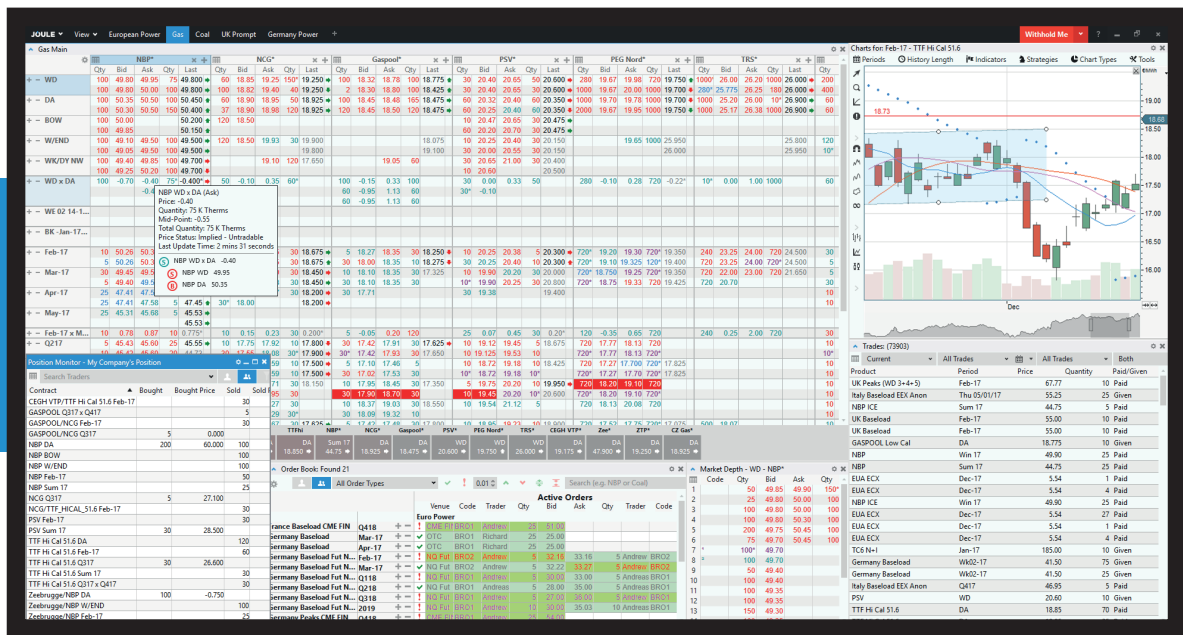

The primary electronic trading platform in the European wholesale energy market. Our network includes:

- 3,700+ traders
- Clients in over 30 countries
- 15 Exchanges
- 23 wholesale brokers & 5 CCPs
- Dedicated connectivity to key venues to ensure you are always in the market

Access Markets On The Go

- Easy, convenient access to the market wherever you are
- Your personal screen design from your desktop mirrored on your mobile device

Position Monitor - My Company's Position

Joule® Enhanced Trading and Order Management Tools are now available exclusively to our Joule SaaS clients.

Automated TradingSM

Trayport's Automated Trading (AT) lets you run additional execution strategies within Joule, ensuring you are as close to the market as possible.

Implied Price CalculatorSM

Trayport's Implied Price Calculator (IPC) enables you to use real-time price information to generate more complex implied spreads within Joule. This allows you to realise strategies and relate prices across instrument sets and calendar periods; opening up new opportunities for smarter trading.

Customer PortalSM

Trayport's Customer Portal allows you to connect electronically to your customers. The order management platform allows you to more efficiently distribute or receive real time quotes from customers, allowing you to more effectively manage and increase transparency and flow with your customer base.

Internal Order Management SystemSM

Trayport's IOMS is a high performance internal order management and trading platform. Designed to support increasing internal order flows within organisations, the platform provides order management and workflow support, on a high performance auditable platform.
