**FLEXIBILITY, INSIGHT AND
CONTROL**

autoTRADER

The complete solution for manual and automated trading.

As markets rapidly evolve, traders need tools that give them the advantage. Trayport and Trayport VisoTech have developed the solution that traders demand. Trayport's Joule screen, our leading trading solution for energy markets, is now enhanced with leading-edge algorithmic design and execution capabilities.

UNIQUE VIEW OF THE MARKET

COMPETITIVE ADVANTAGE

Joule now supports Trayport autoTRADER, a powerful trading tool for fully automated short-term power and gas trading on energy exchanges as well as brokered OTC markets. The autoTRADER solution:

- Is integrated within Trayport's Joule trading screen, supporting manual and automated trading with no additional software required
- Enables fast execution in milliseconds to get the best price
- Provides out-of-the-box algorithms for position closing and flexibility marketing as well as white-box algorithms allowing traders full visibility of the basis of the algorithm decision
- Allows traders to simultaneously trade products in a wide range of price zones
- Provides visibility and control of algorithms directly from your Joule screen
- Allows traders to view time series (positions, parameters etc.) in their Joule screen

FLEXIBLE TRADING

Access power & gas, spot, forwards & futures algorithms in one screen. The solution supports any combination of manual and automated trading - from fully manual to fully automated, or anything in between, including:

- Automated trading at night and weekends for 24x7 trading
- Automated trading only for specific situations
- Automated trading of individual assets or portfolios

The Trayport autoTRADER allows users to react quickly to changing market conditions to fulfil trading targets without requiring manual intervention. It integrates seamlessly with manual trading, giving traders full control of your trading process.

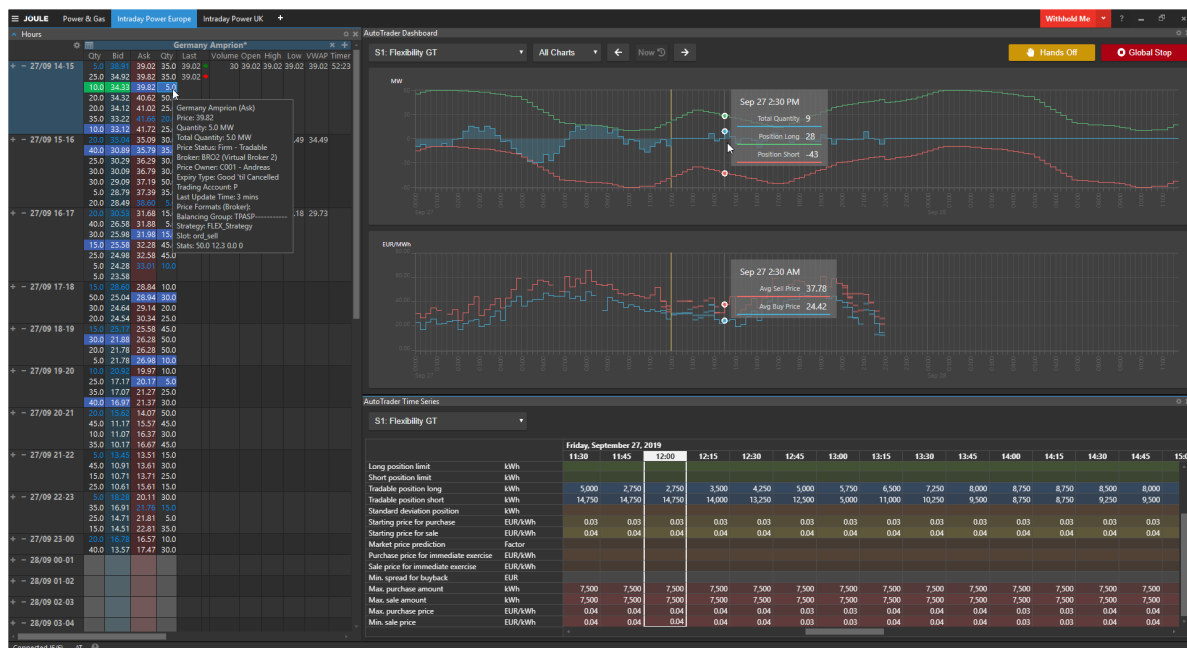

MAXIMISE YOUR TRADING OPPORTUNITIES

COMBINED TRADING METHODS

Easily differentiate between manual and algorithmic orders and trades in the consolidated market view. The ToolTips show traders additional information from the algorithm strategy, giving you an enhanced view.

CONTROL

The autoTRADER dashboard allows you to visualise algorithm operation as well as current and past behaviour. Quick access to pause, stop and resume automated trading directly from your Joule screen.

MULTIPLE VIEWS

View active orders and the value weighted average price (VWap) that the algorithm has achieved directly within Joule. Traders can manage and oversee multiple strategies in different dashboards to keep track of automated trading activities as strategies grow.

TIME SERIES VIEW

Visibility of the algorithm parameters to see what autoTRADER is using as the basis for trading behaviour.

Trayport's autoTRADER:

- Allows automation of strategies such as position closing and flexibility marketing
- Gives traders control to utilise resources efficiently and to react quickly to fluctuations in production or demand

Contact us now to find out how you can experience the Trayport autoTRADER solution for manual and automated trading.
